Subject: Garibaldi City Council meeting

I left tonight's city council meeting extremely disappointed! It is appalling to hear the bickering and accusing tones used by council members toward the city manager and the mayor. To think that spending \$5000 for Garibaldi Days could elicit such an ugly response is difficult to understand. Our former mayor, the council member who started this argument, wasted huge amounts of money on attorney fees in the past along with the previous city managers. Now they want to start a fight about \$5000?! The city manager has had to clean up the mess that was left and now they are nit-picking on something that would actually get sponsorships for Garibaldi Days. The city manager did absolutely nothing wrong! As a city resident and taxpayer I am so tired of the pettiness! Our council should be there for the benefit of our city, not some personal agenda or vendetta!
